

### **The Next Step... Future Plans**

Being a country school in very drought affected area this program has given a direction, a hope, for the future. We are now planning to fully implement our plan of action. Parents have formed a band that they intend to use for fundraisers for school grounds.

The schools grounds are huge, the drought significant, the challenge great.

This colourful shade/shelter/seating area was organised by one of the teachers ages ago who then retired and nothing happened. The Schoolgrounds for Learning project reignited its completion and the kids painted it.
